Practical Information

Address of the Venue

The DHAN Academy

T. Malaipatti, Thenkarai BO, Mullipallam SO, Sholavandan (Via) Vadipatti Taluk, Madurai District, Tamil Nadu 625207

Address of DHAN Central Office

DHAN Foundation

1A, Vaidyanathapuram East, Kennet Cross Road, Vaithyanathapuram, Madurai, Tamil Nadu 625016

Address of Inspiration (LAICO Guest House)

4/44, Kuruvikaran Salai, Gandhi Nagar, Madurai – 625020

(Landmark: Near Aravind Eye Hospital and LAICO building (a corner building will have a board as “Inspiration – LAICO’s Trainees Hostel”))

Google map: [Inspiration](#)

Contacts

For details pertaining to the program please contact -

Ms. Arnaz Dalal (Mob +91 9850843940)

Prof. Prakash Satyavageeswaran (Mob +91 9866661720)

For coordinating at the venue / issues with finding the place, etc., please contact-

Mr. Rajappandian (Mob +91 8825834602)

For coordinating details of the LAICO guest house -Inspiration please contact-

Mr. Khaleel - Front office Manager (Mob +91 9842125258)

Reception: 0452-4356800

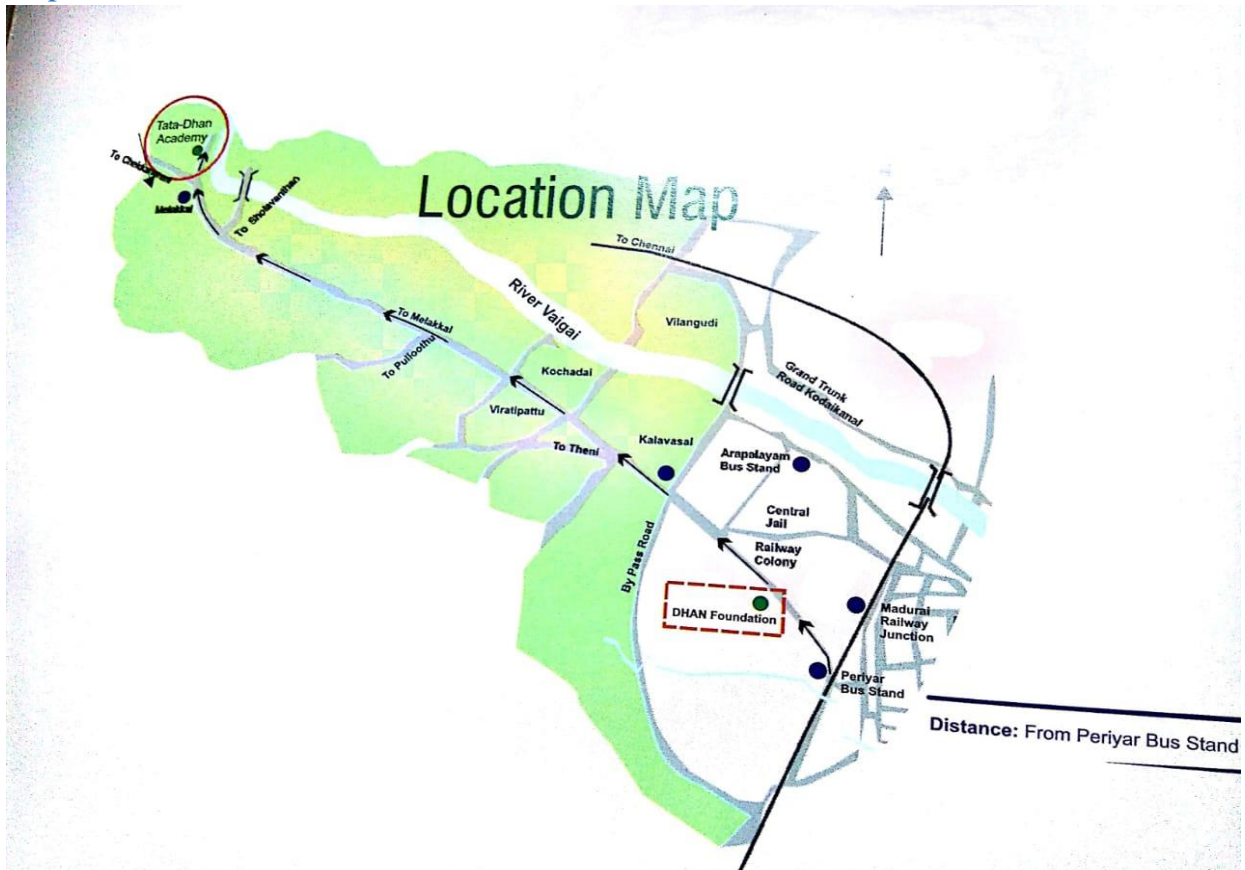

Distance from Airport

The airport is at a distance of 40.2 kms from The DHAN Academy (via NH 44 is the fastest route) and is expected to take about 50 minutes.

Via NH44 and Melakkal Road it is at a distance of 35.8 kms and is expected to take about 56 minutes depending on traffic conditions.

Please budget travel time on the higher side while heading back to the airport.

Immersion Program Agenda

DHAN Foundation, Madurai

Development Immersion Programme (DIP) on Microfinance and Health

Purpose

1. Understand the *Socio-economic profile* of the community in rural and urban context
2. Understand and appreciate the *SHG federation Model and integration of health and sanitation* in addressing the poverty – *formation of social capital for health*.
3. Exposure to *Community Health Interventions of People Federations* to understand the social capital for girls and mothers, nutrition interventions, WASH initiatives, community hospitals and best practices on Behavioural change communication etc with the perspective on partnership engagement with DHAN Foundation.
4. Interaction with the *community and community leaders* for gaining experience and excitements to move poor out of poverty.

Duration of the programme: One day (6th July 2018, Friday)

Immersion Programme Coordinators:

- Gurunathan (94434 19064)
- R. Rajapandian (88658 34602)
- S. Ahiladevi (93646 43432)

Module 1: Institutional perspective and Poverty alleviation Interventions of DHAN

This module focuses about the understanding the institutional perspective on poverty, poverty alleviation initiatives of DHAN and SUHAM Community Health Interventions.

Venue: DHAN Central Office, Madurai

Module 2: Social Capital, Poverty, Development and Financing

This module focuses about the understanding poverty in rural and urban contexts, socio-economic profile of poor community, microfinance initiatives in addressing poverty and significant impact of Kalanjiam SHG model.

Venue: Vaigai Vattara Kalanjiam (Rural) and Sellur Vattara Kalanjiam (Urban)

Module 3: Microfinance and Health

This module focuses about the understanding relationship between microfinance and health and health initiatives of DHAN towards addressing poverty.

Venue: Vaigai Vattara Kalanjiam, Sellur Vattara Kalanjiam and SUHAM Community Hospital

Outputs

1. Understanding the poverty scenario of rural and urban contexts and factors influencing poverty
2. Learnings from health initiatives of community which brings accessibility and affordability
3. Partnership scope with DHAN Foundation and areas for joint interventions
4. Evolved tentative plan for joint works

Programme Schedule

- 09.30 - 09.40 am : Welcome & Introduction
- 09.40 – 10.20 am : Presentation on DHAN Foundation – Institutional perspective on poverty reduction and its interventions
Shri. M.P. Vasimalai, Executive Director, DHAN Foundation
- 10.10 – 10.30 am : Clarifications
Briefing about field visits
- 10.30 – 11.15 am : Transit to Vaigai Vattara Kalanjiam
- 11.15 am – 12.00 : Presentation on the SHG Federation & its initiatives
Noon
Interaction with the community
- 12.00 Noon – 01.30 : Interaction with SHG members and adolescent girls' groups
pm
Visit to WASH initiatives
- 01.30 - 02.30 pm : Lunch
- 02.30 - 03.45 pm : Sellur Vattara Kalanjiam – Understanding urban initiatives
- 03.45 - 05.00 pm : SUHAM Community Hospital Visit

EHA Consortium Meeting

The meetings on both the days will be held at The DHAN Academy at the 'Vaigai' Conference Hall.

Transportation

- For all participants staying at Inspiration (LAICO Guest House), a bus has been arranged. Note that the pickup time in the morning will be at **7.45 AM** on both days.
- A second bus will pick up participants who arrive at the DHAN Central Office at **7.30 AM** and bring them to The DHAN Academy. This arrangement can be availed by participants who have made their own accommodation arrangements but wish to travel to The DHAN Academy by the pickup bus.
- The same bus will drop the participants back to Inspiration and DHAN Central Office. It will leave at 6.00 PM on 7th July to DHAN Central Office/ Inspiration and by 2.30 PM to the Airport and DHAN Central Office on the 8th of July.

Catering

Working breakfast and lunch will be provided at The DHAN Academy on both days with two tea/coffee breaks.

Preamble

Healthcare in India is not an electoral issue, unlike what it is in developed countries, such as the United States, where health policies hold the center state in political debates. Hence, government investment in public health has been abysmally low.

According to an article in Forbes Asia (dated 12th September 2017), by Suparna Dutt D'Cunha, out-of-pocket private payments make up 75% of the total expenditure on healthcare. Only one fifth of healthcare is financed publicly. Differential distributions of services, power, and resources have resulted in an extremely skewed access to quality healthcare for Indians, with about 90% of Indians essentially being left to fend for themselves with regard to healthcare issues.

Hence an acute need was felt for dialogues between established and upcoming healthcare institutions spanning various healthcare specialties, to provide access to healthcare for all, irrespective of the patient's capacity to pay.

Exemplary organizations in the healthcare space such as L. V. Prasad Eye Institute (LVPEI) and Aravind Eye Care Systems (AECS), and several other socially-minded healthcare ventures have shown what is possible in the realm of equitable access to healthcare in their respective domains of expertise.

It was also felt that healthcare is not an isolated factor contributing to human well-being. Its immediate connection to livelihood and education of the next generation is apparent. Thus, the germ of an idea was born to get like-minded organizations to form a network to create synergies. This resulted in a meeting of about forty individuals representing ten organizations in healthcare, education and livelihood on 6th March 2018. The basic objective of this meeting was to explore the potential for creating a forum for mutual learning, ideation to create synergies and take up these ideas for implementation, through the stages of pilots and subsequent scale-up. The deliberations during this meeting, wherein potential for such a network was realized, led to the formation of The Equitable Healthcare Access (EHA) Consortium.

EHA is a Consortium of socially-sensitive healthcare providers, organizations involved in fostering livelihood for the poor, and education institutions targeting the poor, from across the country, who can, through networking and resource sharing, come up with new and improved models for providing access to healthcare, livelihood and education to the poor. Hopefully such a model will provide inspiration for similar experimentation in different parts of the world, especially in the developing world.

The EHA Consortium has already spawned Pilot projects in the areas of school health, women & child development, eye banking, eye care support, colo-rectal care, and livelihood opportunities. More information about these pilots and the EHA Consortium's current members is available in the Consortium's website - www.ehaconsortium.org.

Meeting Objective and Goals

- Induction of new members
- Review the status on current pilot programs
- Explore new synergies and initiate new pilots in line with them
- Explore avenues for formally organizing the consortium

Participating Organizations (in alphabetical order) and Participants

The list may get updated based on more participants confirming their attendance

Organization	Participants
Action Research & Training for Health (ARTH)	Dr Sharad D. Iyengar
Address Health	Dr. Anand Lakshman
Ameya Life	Dr. Dr. N. S. D. Prasad Rao
Aravind Eye Care Systems (AECS)	Dr. Devendra Tayade Mr. Thulasiraj R.D
Arogyamarg Healthcare Diagnostics	Mr. Rajesh Reddy A. Dr. Sudha Murthy Ms. Anuradha Dr. Mahesh
Basic Health Care Services	Dr Pavitra Mohan
DHAN Foundation	Mr. M. P. Vasimalai Mr. R. Rajapandian Ms. A. Umarani Ms. K. Ramaprabha Mr. A. Gurunathan Mr. Sadhasiva
Doctors for Seva	Dr Santhosh Kumar Kraleti
Global Hospital & Research Centre -Mt Abu	Dr. Roja Tumma
Indian Institute of Management - Udaipur (IIMU)	Prof. Prakash Satyavageeswaran
Indian School of Business - Hyderabad (ISB)	Prof. D.V.R. Seshadri
Kauvery Hospital	Dr. S. Chandrakumar Ms. J. P. J. Bindhu
L V Prasad Eye Institute (LVPEI)	Dr. G. Chandra Sekhar Dr. G. N. Rao Ms. Anshu Bhargava
Mohan Foundation	Mr. Ruben Victor
Narayana Institute of Neurosciences, Bangalore	Dr. Komal Prasad C.
People Tree Hospitals, Bengaluru	Dr. Chandrasekar C.
Samadrushti Kshamata Vikas Evam Anusandhan Mandal (SAKSHAM)	Mr. Kasinadh Lakkaraju
Sankalp India Foundation	Mr. Lalith Parmar
Sant Singaji Institute of Science and Management Madhya Pradesh - (SSISM)	Mr. Pranjal Dubey Mr. Prashant Sharma
Smiles International Institute of Colo-Proctology	Dr. Parameshwara Munikrishna Mr. Vamsi Mr. Akshay Ms. Shruthi
Special Smiles (Vatsalya Dental)	Dr. Srivats Bharadwaj Mr. CR Nitin Ms. Sharmila Udupa Ms. Sudha
Sri Satya Sai Sanjaveeni Hospital, Raipur	Dr. Ashish Katewa
Sri Shankara Cancer Hospital, Bangalore	Dr. B S Srinath
Swami Vivekananda Youth Movement	Dr. (Flt.Lt.) M.A. Balasubramanya

Vikram Hospital	Dr. Rajesh B. Iyer
Individuals	Prof. Ram Nidumolu
Observers	Ms. Anumeha Srivastava Mr. Adishankar Mr. Kartic Vaidyanathan

Agenda

Agenda for the Second Meeting of the Equitable Healthcare Access Consortium

The DHAN Academy, Madurai, 7-8 July 2018

Date	Time	Agenda
7-Jul-18	7.45 AM (Sharp)	Pick up by bus from Inspiration (AECS) guest house for drive to DHAN Academy (45 minutes). Arrive at DHAN Academy at 8.30 AM
	8.30 AM to 9.15 AM	Breakfast at The DHAN Academy Dining Hall
	9.30 AM	Assemble at conference room: 'Vaigai Hall' at The DHAN Academy
	9.30 AM to 9.40 AM	Welcome by Mr. M. P. Vasimalai
	9.40 AM to 10.10 AM	Setting the Context: EHA Consortium in the Context of the Challenges faced in Indian Healthcare System – Prof. DVR Seshadri and Prof. Ram Nidumolu
	10.10 AM to 10.50 AM	Self-introductions by participant organizations and Induction
	10.50 AM to 11.30 AM	Update on Pilots and plan for next quarter for and SIICP – DHAN pilots - Session Chair - Mr. M. P.

		Vasimalai
	11.30 AM to 12.00 PM	Tea Break and Networking (Conference Room)
	12.00 PM to 1.15 PM	Update on Pilots and plan for next quarter for SAKSHAM – LVPEI, DHAN – LVEPI and Ameya – LVPEI pilots - Session Chair - Dr. GCS
	1.15 PM to 2.30 PM	Lunch at The DHAN Academy Dining Hall
	2.30 PM to 4.30 PM	Open session on New Pilots and Collaborations - Session Chair - Dr. B. S. Srinath
	4.30 PM - 4.50 PM	Tea Break (Conference Room)
	4.50 PM - 5.50 PM	Research Agenda - Prakash, DVR, AECS, LVPEI, DHAN - Session Chair – Mr. R. D. Thulasiraj
	5.50 PM - 6.00 PM	Wrap up – Dr. M. Parameshwara
	6.00 PM – 7.00 PM	Drive from DHAN Academy to Inspiration Guest House (AECS)
8-Jul-18	7.45 AM (Sharp)	Pick up by bus from Inspiration (AECS) guest house for drive to The DHAN Academy. Arrive at The DHAN Academy at 8.30 AM
	8.30 AM to 9.15 AM	Breakfast at The DHAN Academy Dining Hall
	9.30 AM	Assemble at conference room: 'Vaigai Hall' at The DHAN Academy
	9.30 AM to 11.30 AM	Discussion on way forward for the consortium - All org. reps. Formal organization, representatives, trustees, funding, membership- Session Chair – Dr. G. N. Rao
	11.30 AM to 11.55 AM	Tea Break and Networking (Conference Room)
	11.55 AM to 12.55 PM	Next meeting - where/ when/ broad agenda - Open Discussion – Moderator Dr. C. Chandrasekar
	12.55 PM	Wrap up and vote of thanks – Mr. Rajapandian
	1.00 PM to 2.00 PM	Lunch at The DHAN Academy Dining Hall Happy Journey!

Prakash Satyavageeswaran and Anshu Bhargava will make a succinct summary that will be emailed to all participants by the end of day, 12th July 2018.

There will also a monograph brought out that will be sent to the participating organizations by the end of August 2018.

Vision, Impediments and Avenues for Synergy

Vision

Action Research and Training for Health (ARTH)	Simplify, de-medicalize services, improve financing of health expenditures
Address Health	Equitable healthcare access for the poor, is access to promotive, preventive and curative healthcare, which enables each individual, family and community, irrespective of economic status, to attain a state of positive health.
Ameya Life	Ameya Life is a Social Enterprise focusing on preventive health care to prevent NCDs (Non-communicable Diseases). Today the disease burden is 62% (i.e., percentage of populations with various NCDs), out of 90% of this burden can be prevented provided mechanisms for regular health education, health awareness and screening are put in place. Ameya Life School Health is a unique and innovative healthcare delivery service for students (especially school-going) to live a healthy life style and prevent NCDs in the long run.
Aravind Eye Care System	<ul style="list-style-type: none"> • A healthcare delivery design that is proactive and inclusive with appropriate access and pricing strategies • Placing the patient’s well-being in the fore • Ensure right care at right time at right place • Patient centric and non-exploitative • Empowered patient and a partner in the decisions
Arogyamarg Healthcare Diagnostics	Arogyamarg Health Care Diagnostics Private Limited is a unique initiative in preventive health care that provides affordable and quality diagnostics services to semi-urban and rural segments of the country. With the state of art technology and IT integration in healthcare, we strive to make preventive health care and efficient service to the society. Our Initiative of setting up of Preventive Health Care Centers (PHCC) is first of its kind in the health care industry. With a mission of taking healthcare diagnostic services with high standards to the rural India at affordable prices, we are working on a multi-pronged approach to comprehensive health checkups, wellness, health education and awareness.
Basic HealthCare Services	A responsive and effective healthcare ecosystem that is rooted in the community, where members of the most vulnerable communities can actively access high-quality, low-cost health services with dignity
DHAN	Every intervention of DHAN targets only the poor and vulnerable. DHAN works for ensuring accessible, affordable and quality healthcare

	for the poor. Equity and quality are significant outcomes achieved by involving community contribution and participation. The initiatives are community-centered and community governance is built into the system for long-term sustainability of the initiatives.
Doctors for Seva	Doctors for Seva (DFS) envisions a comprehensive system of quality public healthcare with integration of various organizations, governments, public and private healthcare providers as well as donor organizations. They aim to bring all the partners together to address key public health problems with innovative processes and management solutions. DFS aims at achieving this vision by being a ground-level implementing agency taking healthcare to the grassroots level and also by being a platform for enabling exchange of resources for various stakeholders. DFS operates by engaging doctors trained in different specialties as part-time and full-time volunteers and also fostering community engagement by training volunteers as public health workers.
Fernandez Hospital	<p>Fernandez Hospital focuses on the woman and the newborn, with maternity services forming 85% of its clinical work. Their vision to achieve equitable care is operationalized via three channels.</p> <ol style="list-style-type: none"> 1. To continue building medium-sized hospitals (50 beds) in the community with a collaborative model of care, involving a strong professional midwifery cadre and obstetricians working seamlessly together. This low-cost model can be accessed by a wider socio-economic spectrum of women. The midwifery workforce ensures low caesarean sections rates (i.e., more natural births) and better outcomes for both mother and baby. 2. To continue training midwives in public hospitals and work with obstetricians to offer respectful care with evidence-based clinical protocols for women below the poverty line. 3. To strive (through clinical research and innovation) to seek cost-lowering options in healthcare services.
Global Hospital & Research Centre	Healthcare for all irrespective of social or economic background. This is possible when everyone joins hands towards the same vision.
Kauvery Hospital	The philosophy of Kauvery is to make great healthcare affordable and to become the most respected and trusted healthcare provider in India. Better care coordination and greater access to necessary medical services and support in Cardiac Care, Renal Care and Cancer care will ensure our service reaches the needy.
LVPEI	LVPEI aims to develop a robust, high-quality Primary Eye Care network for Andhra Pradesh, Telangana and Odisha (150 million population) and

	build Institutes of Excellence.
Mohan Foundation	To ensure every Indian who is suffering from end stage organ failure be provided with the Gift of Live through life saving organ. Equal right to access transplant surgeries.
Narayana Health	"Our mission is to deliver high quality, affordable healthcare services to the broader population in India"
NanoHealth	The awareness on non-communicable diseases, particularly on their management is very limited in the country. Managing NCDs is an inter-play between lifestyle management and clinical care management. There is a requirement for behavioral change and a recognition to invest in early stage management, which is difficult across population segments, and more exacerbated within resource-constrained settings. NanoHealth aims at addressing this important aspect of healthcare.
PEOPLE TREE Hospitals	At PEOPLE TREE Foundation, we strongly believe high quality health care must become every citizen's birthright. Also, it should become readily available and easily accessible irrespective of their ability to pay. With 30% of India's population living below the poverty line, and about 60% of the population unable to meet sudden or unplanned healthcare expenses, free or subsidized healthcare is the need of the hour. We aim to bridge this gap by identifying the needy and finding the PEOPLE who can support them. We wish to ensure that each and every one will get the same high-quality health care they deserve.
SAKSHAM	SAKSHAM is committed to the comprehensive rehabilitation of differently-abled persons. SAKSHAM tries to integrate the differently-abled persons into the mainstream society by reaching remotest corners of India with community participation. SAKSHAM believes in working with other NGO's, Governments and individuals to realize its objectives.
Sankalp India Foundation	As an organization we believe in last mile delivery and providing same quality of treatment to everybody. We have also published a paper showcasing the same. We believe every citizen should have access to quality healthcare irrespective of financial background
SIICP	SIICP envisions equitable healthcare for all. It believes that for reasons of lack of money, no person should be denied healthcare. Outstanding examples of such institutions are LVPEI, DHAN Foundation, Aravind Eye Care Systems (AECS), and Satya Sai Hospitals. The private sector has made transformational changes in health care with a huge social impact. SIICP's vision is to go forward with PPP models and collaborations with like-minded organizations. SIICP works on eradication of quacks to prevent colorectal problems. It also seeks to bring about attitudinal changes among the impacted communities by

	encouraging them to change their habits (such as eradication of open air defecation), which lead to colorectal problems in the first place.
Singaji Educational Society	To bring about socio economic transformation of the rural society by imparting high quality holistic education to rural youth.
Special Smiles	Special Smiles seeks to provide equitable good quality dental care, while maintaining high standards. Its belief is that dental care is the gateway to good healthcare.
Sri Sathya Sai Sanjeevani Hospital	India shares 46% of the global burden of congenital heart disease. Each year 200,000 children are added to this pool. Paediatric Cardiac specialty is one of the most resource intensive branch of medicine, thereby making it expensive and inaccessible to majority of the sufferers. Sri Sathya Sai Sanjeevani Hospital provides this elite care at free of cost and provides a model which is sustainable and replicable. Our vision is to scale up this model and make an important contribution in reducing the disease burden of congenital heart defects.
Sri Shankara Cancer Hospital and Research Centre	<ul style="list-style-type: none"> • To provide state-of-the-art treatment to all cancer patients at affordable cost irrespective of caste, creed, and socio-economic status. • To offer free treatment to the poorest and set aside 10% of beds and services for this purpose. • To reduce the incidence of cancer in rural areas and detect cancer in early stages through various interventional Standards. • To provide medicines at highly subsidized costs. • To develop a centre for research under eminent scientists and medical professionals so as to drive the research activities towards reducing the burden of cancer in the society, improving treatment standards and academically remaining in the cutting edge of science. • To make treatment affordable by reducing the basic cost of treatment and enabling the patients to obtain state-of-the-art contemporary treatment.
Swami Vivekananda Youth Movement	All the individuals should have access to appropriate health care which is affordable and high quality. This includes regular preventive care, curative care, in addition to emergency care, as well as mental health support. The poor should also get access to the subsidized secondary and tertiary care. There should not be social discrimination in the health care set up for vulnerable community.
Anumeha Srivastava	I believe that access to quality care and rehabilitation services in India is only possible through peer to peer training among people with disabilities and community-based rehabilitation. Hospitals need to work as training centers and governments and corporates need to fund such programs.

Kartic Vaidyanathan	Equitable HC is an absolute must and should be done on a war-footing. Very happy that the govt. decided to create insurance for the poor in recent budget but there is lot more to be done in terms of infrastructure. Believe it's possible if people come together.
S Adishankar	Affordable healthcare is a basic right of every citizen and should be made available to all without any impediment or constraint.

Impediments

Action Research and Training for Health (ARTH)	Policy, programme and societal
Address Health	<ul style="list-style-type: none"> • Health Behavior • Skewed distribution of healthcare resources – both physical & human • Lack of focus on non-medical intervention determinants of health
Ameya Life	<ul style="list-style-type: none"> • Long sales cycles and receivables from schools • Default rate of receivables from schools
Aravind Eye Care System	Current design of health care services which is largely reactive by design - focus being on cure rather than prevention - essentially treating those who are able to come and when they present themselves - sometimes too late for good outcomes.
Arogyamarg Healthcare Diagnostics	There is poor awareness among people especially in rural and semi urban segments of the society. So, creating awareness among the people takes lot of efforts and reaching the masses need collaborations across.
Basic HealthCare Services	Availability of skilled health professionals (especially physicians) and operations management restrain our scaling up efforts.
DHAN	<ul style="list-style-type: none"> • Making available adequate, high quality, motivated human resources is a major challenge to moving towards its vision. • Financial resources for new start-up interventions for scaling up its model. • Dedicated human resources with long-term commitment for scaling up to the next level • Technical support for its healthcare model development and for continued innovations
Doctors for Seva	<ul style="list-style-type: none"> • Complex bureaucratic procedures in the government, leading to hampering of public health innovations. • Low share for public health spending in the Government's social sector funding. • Leadership in taking the mission of volunteering within healthcare providers and community
Fernandez Hospital	<ul style="list-style-type: none"> • Lack of trainers for professional midwifery. FH's in-house program requires the presence of senior midwives from the UK to help understand professional midwifery as this unique workforce does not exist currently in the Indian healthcare service landscape. • The second challenge is to convince policy makers of the need to embed professional midwifery as the backbone of maternity services across the country. Only then can more nurses be

	<p>attracted into this unique and much needed profession. There is an urgent call to scale up the training to meet the country’s annual birth rates (about 22 million per annum).</p> <ul style="list-style-type: none"> • The third constraint is finance, especially since FH is totally self-funded.
Global Hospital & Research Centre	<p>Illiteracy, Poor living conditions- lack of clean water and sanitation facilities affect health. We need supporting organizations and volunteers to work towards this goal. Need financial support / Donations to sustain and provide good healthcare to poor.</p>
Kauvery Hospital	<ul style="list-style-type: none"> • Providing low cost healthcare to underprivileged populations while managing healthcare provider’s cost without compromising on quality of healthcare. • Variable access to quality healthcare between rural & urban leading to challenges in providing high quality clinical services to remote areas, tier four town and rural areas. • Raising Healthcare costs combined with low insurance penetration have often resulted in greater out-of-pocket expenditure leading to underprivileged families being pushed into debt.
LVPEI	<p>Skilled Human Resources</p>
Narayana Health	<p>Sharing and learning best practices for quality affordable healthcare for the masses</p>
Mohan Foundation	<p>Lack of awareness among general public on organ donation. Organ trafficking</p>
NanoHealth	<p>The awareness on non-communicable diseases, particularly on their management is very limited. Managing NCDs is an inter-play between lifestyle management and clinical care management. There is a requirement for behavioural change and a recognition to invest in early stage management, which is difficult across the various population segments, and more exacerbated within resource-constrained settings.</p>
PEOPLE TREE Hospitals	<p>Financial Resources, Skills and Business Models which can work to provide free/subsidized healthcare</p>
SAKSHAM	<p>Lack of awareness in the community; poor infrastructure; lack of trained professionals; inadequate compensation to professionals and lack of innovative financing models.</p>
Sankalp India Foundation	<ul style="list-style-type: none"> • Getting qualified doctors on the ground • Getting committed staff

<p>SIICP</p>	<ul style="list-style-type: none"> • There is a lack of discussion about social business models and case studies such as DHAN, Life Spring, LVPEI, etc. Medical graduates, thus, do not develop a vision and end up in corporate hospitals, even though many of them may like to be part of organizations with larger social missions. • There is lack of commitment to the cause. This leads to lack of budgetary support and absence of visionary leadership.
<p>Special Smiles</p>	<p>Investors / donors do not believe in good quality care for people below poverty line. There is a need to change this mindset.</p>
<p>Sri Sathya Sai Sanjeevani Hospital</p>	<p>India needs approximately 200 paediatric cardiac hospitals performing 1000 operations annually. This not only needs infrastructure, but also trained professionals to serve in these facilities. Lack of awareness about the magnitude of this problem, lack of resources and scarcity of skilled healthcare professionals are there major impediments.</p>
<p>Sri Shankara Cancer Hospital and Research Centre</p>	<ul style="list-style-type: none"> • Lack of Awareness about Cancer and Health in general • The cost and maintenance of medical technology • Lack of health Insurance in the country or any kind of financial health security for the masses • Lack of skilled manpower in the healthcare industry • Health industry does not get the same Tax benefits received by other industries
<p>Swami Vivekananda Youth Movement</p>	<p>Short of support to establish well equipped tertiary health care facility. Challenge in getting human resource for rural health care, lack of sustainable support from the existing system.</p>
<p>Anumeha Srivastava</p>	<p>Understanding the value of quality of life in a country still struggling with primary health and mother and child care might be a far-fetched dream.</p>
<p>S Adishankar</p>	<p>Progressive corporatization of healthcare industry, non availability of generic/affordable medicines, devices and equipment, low insurance penetration levels, lowering standards in government healthcare facilities.</p>

Avenues for Synergy

Action Research and Training for Health (ARTH)	I cannot speculate until I meet and get an idea of participants and their interests, at the meeting
Ameya Life	<ul style="list-style-type: none"> • Networking • Technology collaboration with LVPEI, especially in refractive errors
Aravind Eye Care System	While there can and must have differences and disagreements over the details, there must be clarity on the purpose as well as alignment. This I believe is what will bring about the required synergy.
Arogyamarg Healthcare Diagnostics	We have had a detailed discussion with DHAN on possible collaboration and we have defined the engagement model. To commence, we are getting engaged in Mysore & Mandya region. We wish to explore for alignment of synergies with our participant organizations.
Basic HealthCare Services	<ul style="list-style-type: none"> • What we gain from others: Some of the partners have substantial experience of scaling up health care initiatives. Though most of them are in the secondary and tertiary healthcare space, their expertise in handling large operations would be helpful for us. • What we offer: We have, through our own experience, honed up the skills and knowledge base to set up and run primary health care services in remote and rural areas. We believe that this will be helpful to organizations like DHAN foundation who plan to expand healthcare services to their members.
DHAN	Synergy for sustainable partnership with LVPEI for selected interventions (mutually agreed areas) to benefit poor households in Andhra Pradesh, Telangana and Karnataka.
Doctors for Seva	<ul style="list-style-type: none"> • Gain strategic insights from each of the organizations present in the meeting in building and scaling up sustainable social models for improving access to healthcare. • Potential partnerships in the areas of quality improvement, healthcare awareness campaigns and public private partnerships.
Fernandez Hospital	<ul style="list-style-type: none"> • Learn from other models of care, avoid reinventing the wheel. • Tap into the strengths of each other.
Global Hospital & Research Centre	Learning from others experience and gaining knowledge to benefit society. Building relationships and seeking support
Kauvery Hospital	<ul style="list-style-type: none"> • Funds through philanthropic organization to be channeled to

	<p>healthcare providers to manage the healthcare cost.</p> <ul style="list-style-type: none"> • Working with NGO's, like minded organizations by providing trainings to their team members who are placed across their geographical location. • Strengthen rural social networks & Explore mobile based Telemedicine services through delivery partners.
LVPEI	Learn from peers, new ways of service delivery, and share LVPEI practices for mutual benefit.
Mohan Foundation	Networking with other agencies, guidance from the experts on how to work closely with the community.
NanoHealth	<ul style="list-style-type: none"> • Many opportunities for synergy seem possible through Foundations that can potentially integrate NanoHealth services into their current offering (e.g. DHAN Foundation). • NanoHealth can expand its own offering through inclusion or expansion of services in partnership with other organizations attending the meeting (such as LVPEI for eye care). • There is scope for collaborations to jointly approach the government for healthcare programs for scale up and for creating bigger impact.
PEOPLE TREE Hospitals	We can learn from the giants who have already been there and done that and continue to do that.
SAKSHAM	Synergies with the participating organizations and individuals to overcome the impediments.
Sankalp India Foundation	<ul style="list-style-type: none"> • Understand various models by which individual organizations are delivering their services and learn from same • Understand how organizations approach fundraising. • Understand overall goals of consortium and the strategy to deliver equitable healthcare
SIICP	<ul style="list-style-type: none"> • Collaborate with DHAN and transform the colorectal care at their secondary care facilities. • Collaborate with Ameya health, teach children about healthy eating and lifestyle habits. • SIICP can provide infrastructure and support to LVPEI to set up a secondary / tertiary eye care center at Mandya, thus strengthening its presence in Karnataka. • Explore avenues for collaborative partnerships with Special Smiles in those locations where SIICP is present.
Singaji Educational Society	Enabling the whole initiative at a grassroots level

Special Smiles	Partner with like-minded organizations that understand its vision and help Special Smiles deliver quality healthcare to the masses.
Sri Sathya Sai Sanjeevani Hospital	Learn from other models of equitable healthcare access.
Sri Shankara Cancer Hospital and Research Centre	To understand the approaches adopted by different NGOs and hospitals to make healthcare inclusive and affordable.
Swami Vivekananda Youth Movement	Referral & linkage for providing access to secondary and tertiary health care. Provide training support to improve the skills of paramedical staff, support for setting up well equipped tertiary health care in rural hospital.
Anumeha Srivastava	Organizations with well-established outreach programs and relationships with local communities can start pilots to train community workers in identifying and referring people with disabilities to nearest care centers. Fully rehabilitated independent personnel can then return to their communities to take on helping others with similar challenges.
Kartic Vaidyanathan	I am just coming with an open mind. I feel I will learn a lot by observing and interacting. After that I might develop some synergies to contribute on an individual capacity OR at-least based on my knowledge and experience, be able to suggest/point out organizations/people with whom EHA can try synergizing with.
S Adishankar	To discuss and exchange ideas and thoughts on how to overcome the impediments and constraints and reduce the effect of economic burden of road traffic crashes and injuries.
Ram Nidumolu	Sharing of research and practices

Meeting Expectations

The meeting brings together participants who are proficient and committed as well as extremely busy. In order to maximize the action-oriented output, all participants are expected to adhere to the following common guidelines.

1. Go through the pre-reads / video links which are being shared as part of this document.
2. Please avoid PowerPoint presentations
3. Each participant is expected to familiarize herself with the participating organizations and participants' profiles. This will help do away with formal round of introductions during the meeting and release time for the actual work at hand.
4. Arrive on time in order to ensure the agenda is not compromised.
5. Focus on 'what can we do and how can we do it'.

Brief Profile of Organizations & Participants

Provided in alphabetical order based on name of organization. May get updated based on further confirmations from participants.

Action Research and Training for Health (ARTH)

<i>Particulars</i>	<i>Please enter the details</i>
Name of the organization	Dr Sharad Iyengar, sdiyengar@gmail.com, 02942980075
Website address/ contact details of the CEO/ head of the organization (name, email, phone).	www.arth.in
Links to any videos/ case studies/ reports/ PowerPoint presentation about the organization	
Brief profile of the organization (maximum 300 words)	<p>Action Research & Training for Health (ARTH) is a registered, Indian, non-profit public health organization, established by a group of professionals in Udaipur, Rajasthan in 1997. ARTH's mission is to use research and training initiatives to enable communities to access and manage health care. The organization contributes to improving the health status of underprivileged communities in India, and in Rajasthan in particular. The range of our activities covers three domains -- Reproductive Health, Neonatal and Child Health, and Health Systems and Policy. These are implemented through five operational units, viz. Services, Community Action, Training, Research and Program Support.</p> <p>Since 1997, ARTH has been directly providing primary care, especially reproductive, maternal, neonatal and child health services to a population of 180,000 inhabiting 109 villages and 30 urban slums in two districts of Rajasthan. Three health centers cater to the low-income populations - two are located in interior rural areas and one serves the urban poor (a fourth has been opened recently). Over the last 20 years, ARTH has undertaken numerous health action projects as well as research studies to improve primary health care. We have introduced a copper intra-uterine device (2000) and hormonal device (2016) as alternatives to female sterilization and pioneered 24x7 childbirth services through professionally trained midwives. Innovations to improve access to health care have been described on our website (www.arth.in).</p> <p>Through its Community Action Unit, ARTH has been</p>

	<p>enabling young women to take control of their fertility through pregnancy self-testing and exercising reproductive choice using commodities supplied by community based volunteers. Covering a population of more than half-a-million and 480 villages, the effort to bring family planning to the poorest is now in its second phase of scaling-up, engaging ground level community volunteers (Taruni Sakhis), community mobilizers (Taruni Preraks) and a call-center. In addition to this, ARTH has worked extensively on improving access to safe legal abortion as per India's Medical Termination of Pregnancy Act.</p> <p>To work in tandem with the governmental agencies in order to bring down maternal and neonatal mortality rates, ARTH has trained more than 600 government senior nursing staff and doctors on maternal, delivery and newborn care. ARTH has introduced the Kangaroo Care technique in field areas, government health facility based education to the mothers and families on newborn care and community based home visits to track the newborns after discharge following childbirth. On a large scale, ARTH introduced Continuous Quality Assurance in 80 health facilities of the Government of Rajasthan, spread across 10 districts. We have also trained visiting delegations on RMNCH issues and hosted a seminar for Members of Parliament to apprise them of priorities in maternal, neonatal and reproductive health.</p> <p>ARTH has carried out research studies and implemented trials in collaboration with Indian Council of Medical Research, World Health Organization and leading universities. These have resulted in a range of scientific publications and have triggered changed in policies and programmes.</p> <p>ARTH's work is supported by a range of national and international funders, including very importantly, contributions from the community it serves.</p>
<p>Dr. Sharad Iyengar Secretary</p>	<p>Dr Sharad Iyengar trained in Pediatrics and Public Health in India. He was involved in research and community interventions for Maternal & Child Health & Family Planning at Postgraduate Institute of Medical Education & Research, Chandigarh in the eighties, then worked for United Nations Population Fund (UNFPA) in India from 1990 to 1998, providing technical assistance on contraception, maternal health, safe abortion and neonatal health care for large Area Development Projects. Since 1997, Dr Iyengar has headed Action Research & Training for Health (ARTH) a not-for-profit health organization based in Rajasthan, north India. ARTH's work features research, service innovation,</p>

community action, training and support to government health programs in three areas – sexual & reproductive health, neonatal & child health, health systems & policy.

Dr Iyengar is a member of policy and guidance committees of the Ministry of Health, Government of India, and the government of the state (Rajasthan) in which he lives and works. These include the National Maternal Health Technical Resource Group, the Core Committee to amend the abortion law, the National Human Rights Commission & Core Group on Health, and the Advisory Group on Community Action, a national standing committee to promote community action and accountability within health systems. He was member of a Scientific Advisory Group of the Indian Council of Medical Research (2009-13). From 2000 to 2007 Dr Iyengar served as Co-Chair of the Gender & Rights Advisory Panel, and from 2008 to 2013, as member of the Scientific & Technical Advisory Group (STAG), of the WHO Human Reproduction Programme (HRP/ RHR) at Geneva.

Dr Iyengar serves as Adjunct Professor at the Sanford School of Public Policy, Duke University, in which capacity he teaches global health.

Ameya Life

<i>Particulars</i>	<i>Details</i>
Contact	<p>www.ameyalife.com Dr. N. S. D. Prasad Rao 934625633 ceo@ameyalife.com</p>

Brief profile of the organization	<p>Ameya Life is a brand of Wellcare Life LLP Inc. (identification no. AAB-1711 on 7th October 2012 at Registrar Government of Andhra Pradesh, Ministry of Corporate Affairs Government of India.)</p> <p>The founding members are Dr. N.S.D. Prasad Rao, Dr. N. Pranav and N. Amrutha Rani. At present 20 employees are working with Ameya Life.</p> <p>Ameya Life has impacted 175,000 children in 500+ schools (both government run and privately owned) since the last four years. For every rupee spent by Ameya Life, the SROI (Social Return On Investment) is Rs. 6.36.</p> <p>Ameya Life conducts healthcare education programs to groups of proximate schools. Ameya Life has created health awareness about adolescent health of the girl children and prevention of carcinoma of breast and cervix. Additionally, Ameya Life conducts workshops on first aid in various schools.</p>
<p>Dr. N. S. D. Prasad Rao - Founder & CEO</p> <p>ceo@ameyalife.com</p>	<ul style="list-style-type: none"> ● Over 32 years of experience in the healthcare industry as a healthcare provider, healthcare facility manager and healthcare entrepreneur. ● Civil Assistant Surgeon and previously was DGO, Osmania Medical College ● M.B.B.S. Kakatiya Medical College.

Aravind Eye Care System

<i>Particulars</i>	<i>Please enter the details</i>
Contact	Dr. R. D. Ravindran, Chairman rdr@aravind.org
Links	<ol style="list-style-type: none"> 1. http://www.ted.com/talks/thulasiraj_ravilla_how_low_cost_eye_care_can_be_world_class.html 2. http://www.youtube.com/watch?v=MA5Dzlf7JEE&feature=gV 3. https://www.youtube.com/watch?v=Wfsrg7aait8
Brief profile of the organization	<p>Aravind built a sustainable eye care delivery system which actually gave away over 60% of its services free or at a very steeply subsidized rate often taking its services to the doorstep of rural India and yet remaining financially very viable. This model grew an eleven-bed eye clinic in an old temple city of Madurai in South India into one of the largest and most productive eye care facilities in the world. Since its inception in 1976 till 2017, Aravind has performed over 6.8 million eye surgeries and handled over 58 million outpatient visits. Each year about 460,000 surgeries are performed and over 4 million outpatient visits are handled. Its patient care network now includes twelve hospitals, six community eye clinics and sixty-six (primary eye care) Vision Centres, all in the State of Tamil Nadu.</p> <p>Aravind followed two broad strategies to govern its activities:</p> <ol style="list-style-type: none"> 1. Engaging in direct action: patient care, outreach, research, manufacturing, etc. 2. Creating Competition: this very counter-intuitive strategy has proved to be very powerful in moving towards Aravind/s vision of “eliminating needless blindness” and in strengthening the organization. Real competition is being developed through a proactive capacity building process by sharing all the lessons learnt, detailed procedures, systems, forms and software used at Aravind. In most instances donor money is raised through grants to support other eye hospitals to participate in this process. Lions Aravind Institute of Community Ophthalmology (LAICO) has helped replicate best practices in over 350 eye hospitals worldwide through direct hands-on capacity building engagement and many more through training and publications.
Thulasiraj Ravilla Executive Director, LAICO – Aravind Eye Care System	Mr. Thulasiraj Ravilla has been working in the field of eye care since 1981 at Aravind Eye Care System. He is an active member of the leadership team that established a sustainable, scalable model of service delivery which serves all strata of the society. This has since been studied widely and replicated by eye care

	<p>providers across the globe. In 1992, he shifted his focus to capacity building, training and consultancy by setting up the Lions Aravind Institute of Community Ophthalmology (LAICO) which by 2017, had worked with over 350 hospitals across the globe.</p> <p>With his expertise in setting up culturally relevant solutions to the problem of avoidable blindness, he has served as an Advisor on several national and international bodies: he was the South East Asia’s Regional Chairman for the International Agency for the Prevention of Blindness (2000-2005) and till recently was the President of Vision 2020 The Right to Sight: India. He has been a Technical Advisor to India’s National Programme for the Control of Blindness and to the World Health Organization.</p> <p>Mr. Thulasiraj has been actively involved in several research activities, both clinical and operations research. He has authored/co-authored several articles in peer reviewed publications, book chapters and presented papers in several National and International forums.</p>
<p><i>Dr. Devendra Tayade Manager- Employee Engagement, Aravind Eye Hospital, Madurai</i></p>	<p>Dr. Devendra is a Dentist by qualification who got into Healthcare management to pursue his passion. He has been working at Aravind as Manager-Employee Engagement since 2014. Values system based on basic human values has been key to Aravind’s success. Dr. Devendra was part of the team which wrote down Aravind’s value system based on their research. Besides employee engagement initiatives, he is also involved in consultancy to help other organizations identify their value system. Bringing trust and ethics back into healthcare is his larger purpose and believes that this can be done by influencing the content and delivery of medical and management education.</p>

Arogyamarg Healthcare Diagnostics

<i>Particulars</i>	<i>Please enter the details</i>
Name of the organization	AROGYAMARG HEALTHCARE DIAGNOSTICS

Brief profile of the organization	<p>Basic HealthCare Services (BHS) is a specialized not for profit organization set up in the year 2012, driven with a vision of high quality and low-cost healthcare and nutrition services to the last mile communities, with dignity. BHS, in partnership with Aajeevika Bureau, has designed and set up a unique initiative of AMRIT Clinics that provide round the clock, high quality and affordable healthcare services, to a population of 80,000 living in rural, remote locations.</p> <p>BHS also partners with government to manage a public Primary Health Center (PHC), providing healthcare to an additional 6000 families, most of who are tribal. Recognizing high levels of childhood malnutrition in these areas, BHS has also set-up day care centers (called AMRIT Phulwaris) within the clinic catchment areas to provide nutrition and childcare to children under five years of age. Based on its experience, BHS has developed tools, norms and guidelines to help set up primary health care services in similar remote and rural underserved communities. Our help has been sought by some state governments and some NGOs for setting up Primary Health Care Clinics in similar areas.</p> <p>BHS also shares ground-level evidence and insights to inform</p>

	policies and programs.
<i>Dr Pavitra Mohan</i>	<p>Dr Pavitra Mohan graduated in Medicine and Surgery, and following a residency program in Pediatrics, earned a Doctor in Medicine from University of Delhi. He also earned a Masters of Public Health from University of North Carolina at Chapel Hill. He has earlier served as faculty of Paediatrics at Udaipur Medical College, coordinated research and child health programs at ARTH, a not-for-profit organization and worked as a Senior Health Specialist at UNICEF India Country Office. He has worked and contributed extensively to the field of newborn and child health, equity in health care and in Human resources for health in India. For his contribution to the field of neonatal health, he was awarded Fellowship by National Neonatology Forum of India.</p> <p>In 2012, he founded Basic Health Care Services, a not-for-profit organization to promote models of high quality, low cost primary care health services in underserved areas. Since January 2013, he also leads the Health Services portfolio at Aajeevika Bureau, setting up models of primary healthcare for the migrants. He has published in reputed journals on issues related to equity in health care and human resources in healthcare.</p>

DHAN Foundation

<i>Particulars</i>	<i>Details</i>
Contact	Mr. M. P. Vasimalai Executive Director dhanfoundation@dhan.org 0452-2302500/520 www.dhan.org
Links	Video - https://youtu.be/lbfNqv2TICQ Annual report - http://dhan.org/annualreport.php Presentation - https://tinyurl.com/y9gggtyx
Brief profile of the organization	<p>DHAN Foundation: Overview</p> <p>Development of Humane Action (DHAN) Foundation, a professional development organization, was initiated on October 2, 1997. It brings highly motivated, educated young women and men to the development sector. They are tasked with making new innovations in development to root out poverty from the country. Till date, the Foundation has worked to make significant changes in the livelihoods of 1.65 million poor households in 14 states across the country through innovative themes and institutions.</p> <p>Major themes are: Kalanjiam Community Banking, Vayalagam Agriculture Development, Coastal Conservation and Livelihood, Rainfed Farming, Development Education, ICT for the Poor, Healthcare, etc.</p> <p>The broad purposes for which DHAN stands are:</p> <ol style="list-style-type: none"> 1. Mothering of Development Innovations 2. Promoting Institutions to reach scale 3. Human Resource Development for the social sector <p>The principles guiding DHAN are</p> <ol style="list-style-type: none"> 1. Engaging high quality human resources to work at the grassroots 2. Valuing collaboration with mainstream institutions to demonstrate new and effective intervention innovations 3. Promoting people’s organizations to ensure entitlements and to build an effective demand system 4. Promoting livelihoods to directly address the issues of poverty 5. Enriching the themes and retaining sub-sectoral focus as a strategy for growth <p>Vision of DHAN: “Building people and institutions as</p>

	<p>resource centres for development innovations, scaling up and impacting policy to enable the poor and marginalized communities for poverty reduction, self-reliance and gender equity”</p> <p>DHAN Foundation’s development approach entails a system of inter-linked components. There is a three-way link between thematic focus, creating social capital and mainstream collaboration to promote sustainable development.</p> <p>DHAN Collective: The Foundation and its institutions form the DHAN Collective. The purpose of the DHAN Collective is to nurture and preserve the culture of collegiality, mutuality and solidarity. Shared purpose, core values and resources bind the institutions of DHAN Collective. DHAN as the mothering institution would guide, support and regulate its family institutions on their mission, policies, strategies and values.</p>
<p>Mr. M.P. Vasimalai <i>dhanfoundation@dhan.org</i></p>	<p>M.P. Vasimalai, Founder Executive Director of DHAN Foundation hails from a modest farming family in Madurai district, Tamil Nadu. After obtaining post-graduation in agricultural science, he did his MBA from Indian Institute of Management Ahmedabad (IIMA). His self-exploration in IIMA made him to take the choice of working at the grassroots with the socially and economically disadvantaged communities. Having spent a decade in development work, primarily with Gandhian institutions, he founded DHAN in 1997 with the mission of building professionals for building communities so that the communities can then be enabled to take actions that would help them to come out of poverty. He leads DHAN as an HRD organization to bring highly qualified and socially concerned young professionals to work at the grassroots for making meaningful changes in the lives of the poor families. Today there are about 400 professionals striving hard at the grassroots to bring changes in the lives of the poor. Till date, about 1.65 million poor families in 14 Indian states have been brought out of the clutches of poverty through the work of DHAN. So far, over two lakhs poor families have made a self-declaration that they moved out of poverty. With over three decades of intensive field action, DHAN has evolved Community-led Water Conservation and Agricultural Development, and Community Banking for Women Empowerment as scalable and sustainable models for poverty reduction.</p>
<p>Mr. R. Rajapandian <i>rajapandian@dhan.org</i></p>	<p>Rajapandian is a graduate in agriculture and has a post graduate diploma in Business Administration. He has 19 years of experience in the development sector. He started his career</p>

	<p>as a project executive in DHAN Foundation and become a strategic member guiding people federations and regions across 14 states in the country. At present he holds the position as the Chief Executive in Sustainable Healthcare Advancement (SUHAM) Trust, the healthcare initiative of DHAN Foundation. The SUHAM Trust is the apex institution that supports and guides various people institutions towards making a positive impact on community health & nutrition through interventions in multiple areas such as safe water & sanitation, community hospitals promotion, etc. He has specialized in community organization, designing development interventions in the fields of microfinance, livelihoods promotion, health, nutrition & sanitation interventions and institutional development. He is part of the strategic team in designing an open-defecation-free block as part of a large project of the State Planning Commission, Tamil Nadu. He has participated and presented papers on microfinance, community health & nutrition as well as on sanitation & safe water in National and International workshops and seminars.</p>
<p>Gurunathan A</p>	<p>Gurunathan is a graduate in Agricultural Engineering from Tamil Nadu Agricultural University (TNAU), Coimbatore and masters in rural management from Institute of Rural Management Anand (IRMA). He is the Director of Tata-Dhan Academy w.e.f. April 2015. He has two years experience in irrigation water management, tank irrigation systems in the projects sponsored by IFPRI, Washington and Ford Foundation. He was instrumental in setting up prestigious Automatic dairy plant with Anand Milk Union Ltd, (AMUL), Anand, Gujarat. He has 16 years experience in DHAN Foundation, worked as Chief Executive of DHAN Foundation's Water Theme Collective called DHAN Vayalagam (Tank) Foundation, led a team of 150 Professionals and Para Professionals. He has participated in Round Table Conference and made presentation on Safe Drinking Water for Poor Households at World Water Forum, Istanbul in 2009. He published articles on Small Scale water resources development and management, watershed development, drinking water ponds and water quality etc. He teaches courses in Project Management (PM), and Quantitative Techniques for Development Management Research (QTMR) to PDM students. He served in the advisory committee of National Water Academy, Pune and National Hydrological Institute for hard rock areas, Belgaum. He was involved in the committee for preparation of State action Plan for Climate</p>

	<p>Change Tamil Nadu. He was one of the working committee members constituted by Central Planning Commission Government of India on Water Governance in drafting 12th Five year plan.</p>
<p>B. Sada Siva</p>	<p>B. Sada Siva is a graduate in Agricultural Engineering from the state of Andhra Pradesh. He started his career with corporate companies designing water technology equipments (Micro irrigation). Now, he is co-coordinating field locations in four districts (Nalgonda, Vizianagaram, Yadadri Bhongir and Gulbarga) and liaisoning with the mainstream agencies in Andhra Pradesh, Telangana and Karnataka States. He led the implementation of tank-based watersheds and tank cascades (chain of tanks) revival programs. He worked closely in the development of traditional water irrigation systems in Gaya district of Bihar and supported the teams on Ahar Pyne systems development. In the last 19 years, he and his field teams collectively worked with more than 800 village communities to revive their defunct traditional systems on a scientific basis. He has participated and presented papers on tank management, effective farming systems, entrepreneurship in agriculture, role of MGNREGA (a government scheme) in farming system, and presented policy papers on minor irrigation, etc. He worked as a technical team member constituted by M/s. Rabobank Foundation, The Netherlands for studying the possibilities of assisting the poor in remote dry areas of Sri Lanka through traditional irrigation systems. He is part of the Advisory committee on “Community Managed Hydrological Monitoring and Watershed Management” formed by NABARD in Andhra Pradesh. He closely works with the government and non-government agencies that fund water related programmes. Presently, he is working as a Programme Leader based at Hyderabad.</p>
<p>Umarani A</p>	<p>Umarani is an agricultural graduate from Tamil Nadu Agricultural University, Coimbatore and a post graduate in Personnel Management and Masters in Sociology. She has 27 years of work experience in the development sector. She has wider experience in community banking programme of DHAN Foundation. She was instrumental in promoting a rural federation of women’s SHGs, the first of its kind in Tamil Nadu in 1995. She has conducted many capacity building programmes on microfinance for Government officials, bank officers and NGO officials from within India and from other countries. She is also specialised in Human Resource Development by handling HRD for DHAN Foundation for more than four years. She has undergone Management</p>

	<p>Education Programme in Indian Institute of Management, Ahmedabad. She teaches courses in Microfinance for Poverty Reduction (MFPR) and Leadership Development (LEAD) for PDM students. Presently, she is the Chief Executive of DHAN Kalanjiam Foundation. Her areas of interest are microfinance, HR, and leadership development.</p>
<p><i>K Rama Prabha</i></p>	<p>Rama Prabha is a graduate in Agricultural from Andhra Pradesh Agricultural University (APAU), Bapatla, and masters in sociology from Andhra University, and M.Phil from Madurai Kamaraj University. She is regional coordinator of Dhan Vizag region since 2000.</p> <p>She has 17 years experience in DHAN Foundation, Visakhapatnam. Promotion of sustainable people institutions for poverty reduction viz SHG, cluster and federations, build the capacity of the leaders and facilitating the main stream linkages with Financial Institutions, Insurance Companies, Commercial Banks, Municipal Corporation is her strength. She is strong in organizing and participating in various Training Programme, workshops, and seminars, organizing people events like Mahasabhas and walkathon, movement activities with the community. She is focused towards reducing poverty, focused on urban livelihoods by imparting skill building trainings in collaboration with JSS, MSME, Rotary club, GMR Foundation-NIRED and etc. Her interest is to create sustainable urban livelihood model for coming out of poverty. She also is working to prepare the community to reduce the risk of the disasters.</p>

Doctors for Seva

<i>Particulars</i>	<i>Details</i>
Contact	<p>Dr Santhosh Kumar Kraleti, Senior Advisor, Doctors for Seva. Email: drsanbharadwaj@gmail.com, Phone: 8977788350 www.doctorsforseva.youthforseva.org</p>
Brief profile of the organization	<p>Doctors for Seva (DFS) is a group of medical professionals volunteering to increase accessibility and affordability of healthcare while improving the quality of care at public health facilities. DFS believes in the concept of community service and taking healthcare to those communities that have limited access to healthcare. DFS is currently engaged in improving health of school children, adolescent health education and awareness programs, blindness control programs and enhancing maternal and newborn health. DFS partnered with the various State Governments to give technical and implementation support in the below mentioned projects:</p> <p>Dhaatri Comprehensive Lactation Management Center (Dhaatri): DFS with financial support from various corporates took up a first of its kind initiative to curtail the incidence of newborn deaths in the Telangana and Andhra Pradesh. Dhaatri’s vision is to enable all the mothers to provide their newborns with early and exclusive breast feeding.</p> <p>Dhaatri’s approach:</p> <ul style="list-style-type: none"> • Improving the breastfeeding rate (which is a mere 47% currently) by increasing community awareness about breastfeeding. • Set up Comprehensive Lactation Management Centers for addressing breastfeeding problems and state of the art breast milk banking facilities. <p>DFS partnered with corporates to seek volunteering support from the employees of these corporates and with the Government of Telangana for MAA (Mothers Absolute Affection) program, which focuses on promoting breastfeeding.</p> <p>Rashtriya Kishor Swasthya Karyakram: DFS has thus far conducted workshops on adolescent health and education with focus on menstrual hygiene, prevention of drug abuse and health education in the districts of Visakhapatnam and</p>

	<p>Vizianagaram.</p> <p>Corneal Andhathv Mukh Bharat Abhiyan(CAMBA): CAMBA aims at achieving blindness-free villages by identifying all types of blindness at the grass root level with an approach of community screening and active follow up and referral for appropriate intervention. DFS partnered with the Governments, Public and Private Hospitals and NGOs in implementation of CAMBA. DFS provides strategic, technical and implementation support for CAMBA.</p>
<p><i>Dr. Santosh Kumar Kraleti</i> <i>drsanbharadwaj@gmail.com</i></p>	<p>Dr. Santosh is Senior Health Advisor to Doctors for Seva and Founder and Executive Director, Dhaatri Mothers Milk Bank. He is the National Program Manager for CAMBA and an advisor to the National Health Assurance Mission and National Program on Control of Blindness.</p> <p>He has vast experience of working with social healthcare organizations, Government, and International Not for Profit Organizations (NPOs).</p> <p>He previously worked with ACCESS Health International as a quality improvement expert and as a healthcare financing expert for two projects, viz., Safe Care Saving Lives (SCSL) and Health Financing Support Program. Fernandez Hospital

<i>Particulars</i>	<i>Details</i>
Contact	<p>www.fernandezhospital.com Dr. Evita Fernandez FRCOG evita@fernandezhospital.com 9848050403</p>
Brief profile of the organization	<p>Fernandez Hospital began as a small maternity clinic with two beds in 1948, progressing into a full-fledged hospital for women and the newborn. With a reputation built over seven decades, the hospital network presently comprises five strategic locations in Hyderabad, all focusing on efficient, reliable and personalized healthcare for women. Today it is recognized as a tertiary referral perinatal center with 8000 deliveries annually.</p> <p>The backbone of its medical care involves strict commitment to guidelines based on evidence. Fernandez Hospital is essentially a protocol-led practice with multidisciplinary teams working together towards the common goal of patient safety. Regular medical audits and a robust clinical risk management program help clinicians implement changes where required. The electronic medical record system facilitates easy access to vital information across the three hospital units and two outpatient units.</p> <p>Academic Activities: Fernandez Hospital has been accredited for postgraduate training and post-doctoral fellowships by the National Board of Examinations, in the fields of OBGY (Obstetrics and Gynecology) and Neonatology.</p> <p>Clinical Research The hospital’s Institutional Review Board (IRB) was set up in 2006 to foster research in its areas of expertise. The hospital has had 205 publications till date, comprising those from the Neonatology Department (136 publications) Obstetrics & Gynecology (69 publications). The Neonatology Department has a sound track-record of clinical research, which has positively impacted its care-giving and influenced policy decisions on a national level.</p> <p>Community Outreach Fernandez Hospital’s priorities include providing treatment, without compromise to a wider section of society – an equitable service, irrespective of socio-</p>

	<p>economic status of the patients. The hospital works in partnership with NGOs to serve women below the poverty line. In 2011, Fernandez Hospital launched an in-house Professional Midwifery Education and Training Program (PMET) with a view to offer woman-centered care and reduce unnecessary interventions, including caesarean sections. This led to its campaign PROMISE (PROfessional MIdwifery SErVICES) which embraces 4 objectives:</p> <ol style="list-style-type: none"> 1. Making pregnancy safe 2. Humanizing birthing 3. Training a workforce 4. Promoting midwifery <p>Public-Private Partnership with Govt. of Telangana In November 2017, the Government of Telangana, with UNICEF as the facilitator, initiated a PPP. Fernandez Hospital was given the responsibility of training 30 nurses, over 18-months, into professional midwives. The objective is to have competent, highly skilled healthcare professionals, to help make pregnancy safe, reduce caesarean sections and ensure natural maternity care (to the extent possible), a basic human right for every woman.</p>
<p>Dr. Evita Fernandez <i>evita@fernandezhospital.com</i></p>	<p>Dr. Fernandez (FRCOG, UK) is the Managing Director and Senior Consultant Obstetrician at Fernandez Hospital, Hyderabad. She strongly believes in the need to empower women to make choices, especially relating to issues surrounding birth. Out of her conviction of the vital role and need of professional midwives in India, Dr. Evita launched a two-year Professional Midwives Education and Training (PMET) Program at the hospital in 2011. She is spearheading PROMISE – the Professional Midwifery Services campaign, committed to creating a national cadre of professional midwives, who are vital in the care of low-risk pregnant women.</p>

Global Hospital & Research Centre

Brief profile of the organization	<p>J Watumull Global Hospital & Research Centre is a flagship unit of GHRC trust, a not for profit hospital situated in Mt Abu. Founded in 1991, the hospital stands out for offering modern medicine alongside complementary medicine systems. It runs extensive community outreach programmes in south west Rajasthan and north Gujarat.</p> <p>Global Hospital is the only hospital in the district offering multi-disciplinary consultations with the option of well appointed private rooms, general ward, and day care centre for hospital admissions. A well equipped Intensive Care Unit, three operating rooms, pathology laboratory, imaging department, Dialysis unit and blood bank complete the range of hospital facilities.</p> <p>So far, the hospital has collaborated mostly with NGOs and government agencies for the implementation of community projects for the welfare of tuberculosis patients, cleft lip and palate afflicted persons, cataract afflicted persons, juveniles with health ailments, dialysis patients, etc. Sponsorships also help us free and nominally priced treatment to poor and less affording patients. The Smile Train, Government of India, Government of Rajasthan, GiveIndia, Rotary Clubs of Mt Abu and Abu Road, Global Harmony Foundation, are a few of our partners.</p> <p>Global Hospital also runs extensive community outreach programmes for tribal people and village folk living in district Sirohi and the adjacent districts in Rajasthan and Gujarat. Mobile health clinics offer free doorstep medical consultation and medication to a total of 77 villages with beneficiaries of approximately 150,000 villagers. In Nutritional programme - Everyday sstudents of public schools in 17 villages are served a milk-based snack and fruit during school hours</p> <p>We are working continuously to provide better healthcare for all irrespective of socioeconomic status under able guidance of</p>

L V Prasad Eye Institute

<i>Particulars</i>	<i>Details</i>
Contact	www.lvpei.org Dr. G N Rao, Chairman gnrao@lvpei.org +91 40 30612609
Links	www.lvpei.org https://www.youtube.com/watch?v=g3g1YcIMaFs&t=27s
Brief profile of the organization	<p>Established in 1987, L V Prasad Eye Institute (LVPEI) is a comprehensive eye health facility with its main campus located in Hyderabad, India. A World Health Organization Collaborating Centre for Prevention of Blindness, the Institute offers comprehensive patient care, sight enhancement and rehabilitation services and high-impact rural eye health programs. It also pursues cutting-edge research and offers training in human resources for all levels of ophthalmic personnel.</p> <p>LVPEI focuses on economically disadvantaged groups in rural and urban geographies and extends its services to them through its network of satellite clinics and rural affiliates. The LVPEI network comprises a ‘Centre of Excellence’ in Hyderabad, 3 tertiary centres respectively in Bhubaneswar, Visakhapatnam and Vijayawada, 17 secondary and 171 primary care centres that cover the remotest rural areas in the four states of Telangana, Andhra Pradesh, Odisha and Karnataka.</p> <p>The Institute's innovative and comprehensive approach to community eye health, the LVPEI Eye Health Pyramid, has been adopted as a model by the Government of India and by other developing countries.</p> <p>LVPEI is a World Health Organization (WHO) Collaborating Centre for Prevention of Blindness and a Global Resource Center for VISION 2020: The Right to Sight initiative. The Institute is managed by two not-for-profit trusts: the Hyderabad Eye Institute (HEI) and the Hyderabad Eye Research Foundation (HERF). HEI is registered under the Indian Trusts Act and HERF is registered under the Societies Act. The Hyderabad Eye Institute oversees the activities of the eye hospital, while the Hyderabad Eye Research Foundation is in-charge of all research programs pursued at LVPEI.</p> <p>Equipped with cutting-edge technology and spearheaded by distinguished professionals in the field of Eye care, LVPEI’s vision is to provide equitable and efficient eye care to all sections of society.</p> <p>Through three decades since its existence, LVPEI has served over 23.8 million patients, with more than half the number of patients receiving services free of cost, regardless of the service complexity.</p>

<p>Dr. G N Rao <i>gnrao@lvpei.org</i></p>	<p>Dr. Gullapalli N. Rao founded the L. V. Prasad Eye Institute in 1987, after a successful career in the United States as an academic ophthalmologist. Dr. Rao received his basic medical education in Guntur, Andhra Pradesh, and completed his postgraduate residency training in ophthalmology at the All India Institute for Medical Sciences, New Delhi. He went to the United States in 1974, where he was trained first at Tufts University School of Medicine in Boston, and later at the University of Rochester School of Medicine, where he continued as clinical faculty until his return to India in 1986. His areas of specialization include diseases of the cornea, eye banking, corneal transplantation, community eye health, eye care policy and planning. He has published nearly 300 papers in national and international journals, and has contributed several book chapters, in addition to serving on the Editorial Boards of several journals. He was a visiting Professor at several Universities in the USA, Europe, Australia and Asia and delivered many named lectures around the world. Dr. Rao has been honoured with several international and national awards in recognition of his services to eye care and public health. He also holds several board and leadership positions in prominent national and international organizations. He was recently inducted into the Ophthalmology Hall of Fame, USA. Dr. Rao was also honoured with a Padma Shri in 2002.</p>
<p>Dr. G Chandra Sekhar <i>gcs@lvpei.org</i></p>	<p>G Chandra Sekhar, has been associated with LVPEI since its inception in 1987 and is currently the Vice-Chair, LVPEI and the Director of Kallam Anji Reddy Campus, Hyderabad. GC (or GCS), as he is popularly known is an astute clinician and a passionate teacher. As recognition of his contributions as the Director of Educations at LVPEI, “G Chandra Sekhar Chair of Director of Education” was created in 2003. GC was the head of Glaucoma Service till recently and has trained over 43 Glaucoma Fellows, including 7 international Fellows. He has published over 100 papers in national and international peer-reviewed journals and has been a reviewer for several Ophthalmology journals. He holds the position of clinical Professor at the University of Rochester and has been a visiting professor at University of California, San Diego, USA. GC has served as the President of the Glaucoma Society of India (2005-06) and is a member of the Glaucoma Research Society with its membership limited to 100. He has served on the Clinical Guidelines Committee of International Council of Ophthalmology (ICO) and the Membership Committee of Glaucoma Research Society. He is currently on the board of the World Glaucoma Association.</p>

Brief profile of the organization	<p>Samadrushti Kshamata Vikas Evam Anusandhan Mandal (SAKSHAM) is a charitable pan-India organization registered at Nagpur under registration number MAH/654/2008(N). The organization has its head office in Nagpur, Maharashtra. SAKSHAM was established with an aim to bring all the persons with various disabilities into the mainstream society. SAKSHAM believes that disabled people are not a burden on the society but are assets of the nation. Though presently dedicated to the service of visually impaired, SAKSHAM has its commitment towards all the persons with various disabilities. It is also committed to improve the environment, health and other social aspects in order to strengthen the society.</p> <p>Presently SAKSHAM is running following projects for INTEGRATED DEVELOPMENT OF THE DISABLED:</p> <p>Madhav Eye Bank: SAKSHAM not only propagates the importance and divinity of Eye Donation, but also manages the donation of corneas through eye banking and grafting in order to give sight to the visually impaired. With its pledge to establish at least 100 ‘Madhav Eye Banks,’ the organization so far could establish 12 licensed eye banks in various parts of the country including in the states of Maharashtra, MP, Haryana, Uttar Pradesh, Orissa, Telangana and Chhattisgarh. Under its aegis, presently it oversees the functioning of fourteen licensed eye banks, twelve eye collection centres and twenty four awareness Centres. By the end of year 2010, its chain of eye banks collected around 2500 corneas, thereby benefitting more than 800 corneal blind through sight restoration.</p> <p>CAMBA: To reduce the Corneal blindness all over India.</p> <p>KantiVelugu: To make Telangana state free of avoidable blindness.</p> <p>Samvedana: To rehabilitate children affected by cerebral palsy.</p>
Dr. Veda Prakash Gowda <i>docveda@yahoo.com</i>	<p>Dr. Gowda is a leading Orthopedic surgeon with CARE Hospitals, Hyderabad. At present he is the President of SAKSHAM for the state of Telangana. He is involved with several social service activities. He oversees the rehabilitation service activities of SAKSHAM all over India for the orthopedically challenged and for children affected by cerebral palsy.</p>

Brief profile of the organization	<p>About Vatsalya Dental (Special Smiles): Vatsalya Dental Clinic was founded in 2003 by Dr. Srivats Bharadwaj and one assistant. Vatsalya Dental Clinic today has expanded to 6 centers in Bangalore. Apart from its social initiatives that trains people in preventive dentistry, Vatsalya Dental Clinic provides end-to-end dental treatment at the doorstep. Vatsalya Dental is one of the best dental clinics in Bangalore, providing top-class dental care.</p> <p>Vatsalya Dental Clinic is one of the finest and most advanced dental clinics in Bangalore, listed among the top dental clinics in Bangalore. The organization comprises of 55 team members, including over 30 dedicated doctors, bringing together unmatched expertise. Focused on preventive dentistry, the team also works on various social efforts to sensitize the community on the importance of oral health. Every member of Vatsalya encompasses our founder’s strong belief in hygiene and affordable dental care.</p> <p>Located in Bangalore, this dental clinic has state-of-the-art infrastructure, furnished with modern equipment and with thorough attention paid to hygiene and sanitation. It is a Medi Assist-approved dental clinic in Bangalore and is designed keeping the patients’ comfort in mind. One of the unique features of the clinic is a well-equipped in-house laboratory. At Vatsalya Dental, all patients are assured of the best services in dental healthcare in a non-stressful and comforting ambiance.</p>
Dr. Srivats Bharadwaj <i>specialsmiles@gmail.com</i>	<p>Dr. Srivats Bharadwaj BDS, MDS, FADI, is Specialist Dentist of International repute with over 20 years of experience. He passionately believes in preventive Oral Health. He has presented his thoughts at local, national and international fora.</p> <p>His innovation to provide home dental services has been reported as a game-changer in dental care delivery. Dr. Srivats’ practice, ‘Vatsalya Dental’ is among the highly</p>

	<p>rated dental practices. He has launched the first ever 24/7 Dental emergency service and an exclusive dental care practice for cancer patients. Dr. Srivats is also known for his work on preventive and pediatric dental care.</p> <p>He has served as the head of department and professor at various dental colleges. He has been an invited speaker at various international conferences. He is the clinical director for the Special Olympics International and the council member for International Association for Disabilities and Oral Health.</p> <p>Dr. Srivats has made a distinct contribution in the field of dentistry by conducting workshops on important topics such as: HIV/ AIDS and oral health, forming policies for dental care practice management, oral health and disability, atraumatic restorative technique, Genetics and Craniofacial Syndromes, etc.</p> <p>His articles have been published in renowned international journals; he has been a part of the team involved in developing curriculum on special needs dentistry.</p> <p>Dr. Srivats is just not involved in clinical work but also involves himself in challenging young minds to address issues such as educating the public about their oral health, spreading awareness on importance of dental care, conducting research, innovating on newer gadgets and techniques that would aid dentistry, etc. He also runs a free dental clinic on Tumkur Road for the underprivileged population, who have no access to dental care in the tribal regions of Karnataka.</p>
<p>Mr. Nitin Raghukumar <i>nitin@vatsalyadental.com</i></p>	<p>Nitin, himself a serial entrepreneur, has joined hands with Dr. Srivats in taking Vatsalya to new heights. He has over 15 years' experience, spanning Operations and People Management, Innovation, Business Process Re-engineering and Financial P&L Management. He has experience in customer management and believes in bringing the principles of customer management and operations management to create a customer-oriented organization. Nitin has led corporate expansion into different markets. He managed product go-to marketing strategies and new product development projects during his previous start-up stints. Prior to Vatsalya, Nitin worked in reputed corporates such as Zusammen Machine Tools, Zenith Software, JSW Steel, besides working in Oracle during the formative years of his career. An avid sports enthusiast with passion for car racing, Nitin aspires to bring precision, strategic and operational excellence of Formula1 racing into the</p>

	organizations he is associated with.
Ms. Sharmila Udupa sharmilarudupa@vatsalyadental.com	Sharmila Udupa has been driving strategy development, business development, income generation and communication functions at Vatsalya. Known to be a people's person, she has been Vatsalya's interface with external and internal stakeholders. She has extensive experience in healthcare, education and communication space. Her prior work experience includes some of the key initiatives in education and management research at Apollo Hospital. She has worked with ISKCON in its communications and content development division, her noteworthy engagement being developing content for 'Value Education.' Sharmila has a bachelor's degree in engineering and a post-graduate degree in Business Administration, with focus on international business. She believes in creating a culture of excellence and in building organizations that make a difference.

Brief profile of the organization (maximum 300 words)	<p>YEAR OF ESTABLISHMENT: 1984 SVYM is a development Organization started by a group of medicos of Mysore Medical College in 1984. It is engaged in building a new civil society in India through its grassroots to policy level action in Health, Education and Community Development sectors. SVYM has its headquarters in Mysuru dist Karnataka State in Southern India. SVYM believes that building human and social capital will result in economic consequences and all of SVYM’s programs are driven by this development paradigm. SVYM is also rooted to its values of Satya, Ahimsa, Seva and Tyaga, which is reflected in its program design and delivery, transactions with its stakeholders, resource utilization, disclosures and openness to public scrutiny. Buying in support from the community, working in healthy partnership with the government and corporate sectors and sharing its experiences with like-minded Organizations have been the hallmark of SVYM’s evolution over the past 33 years. DEVELOPMENT PARADIGM: Developing Human and Social Capital to build a resurgent India. VISION: A caring and equitable society, free of deprivation and strife. MISSION: To facilitate and develop processes that improves the quality of life of people. Today, the organization has more than 40 projects in the sectors of health, education, socio-economic empowerment, training and research located in all districts of Karnataka. It</p>

	<p>runs two hospitals for rural and tribal people in H.D.Kote taluk, a residential tribal school with 407 tribal children from Class1 to 10, a CBSE recognized rural school with 509 children, Teacher Training College. In addition, SVYM runs a mobile health unit for tribals, and various tribal, rural and urban development projects focusing on housing, hygiene, sanitation, microcredit, community based health, education & rehabilitation, governance and human rights.</p> <p>Thus, with all these programs and institutions with a secular, non-discriminatory approach, the program initiatives that started in the year 1984, now directly impact about 2.5 million people across 30 districts of Karnataka</p>
<p>Dr.. (Flt. Lt) M A Balasubramanya MBBS, DA, DNB (Anaesthesiology)</p> <p>Secretary</p>	<p>Is a Postgraduate in Medicine with specialisation in Anaesthesiology. As a medical student at the age of 17 years inspired by the teachings of Swami Vivekananda joined a group of medico friends who founded the Swami Vivekananda Youth Movement - a registered Voluntary Social Service Organisation started in 1984. He has contributed largely to the initiation, growth and evolution of the organisation being its President and Chief Executive Officer. The organisation is now nationally acclaimed and serves directly more than 2.5 million people through its 9 institutions and 43 programs in the sectors of Health, Education, Socio-economic empowerment, Training and Research. In April 2018, he has successfully transitioned the operational leadership to a second-generation team of 5. Presently, he is the Secretary of the Organisation.</p> <p>In his more than 33 years of experience, he has wide-ranging experience in managing issues of Health, Education, Research, Training, Evaluation and Advocacy. He has pioneered various public-private partnership initiatives, some of which are National Models in the sectors of Health, especially HIV/AIDS, Emergency Medicine, Palliative Care and Non-Profit Management.</p> <p>He is a Guest faculty in various State and National level training institutes.
